Johnstone Supply –Data Services LLC

Jeff Dobyns

Symbol CS1504 Keychain Bar Code Scanner

Point, Scan, Connect, Submit....The CMI-Better option provides Johnstone and their customers with a low risk, easy to use, completely portable data collection CMI solution. This package is not contingent on connectivity throughout the entire process (only at critical points) so this can work in any environment.

- Data is collected off-line through the Symbol CS1504 scanning bar codes at the customer location (whse, truck(s), job site, etc).
- After data is collected, when convenient, the customer connects the CS1504 to their PC via USB cable, reviews the scans (logs into CMI), one-click to place scans in CMI order pad and submits when ready.
- This process can be repeated as many times as often as needed.

Benefits to the CMI-Better Option

- ✓ It's Better.
- ✓ Low Cost Option with hardware package \$110.00
- ✓ Quick roll out –provide the customer with the labels (for their warehouse/trucks/bins), the device and initial setup.
- ✓ Small learning curve –Point, scan, connect, submit.
- ✓ Customers order more products from Johnstone!
